Suitable for:

SMA® First Infant Milk

is a nutritionally complete* infant milk suitable from birth. It can be used for those infants who are not being breastfed or for those who are being combination fed.

SMA® First Infant Milk

contains a unique blend of milk and 2'FL fibres¹.

Not suitable for:

- 1. Cows' milk protein intolerance/allergy.
- 2. Lactose intolerance.
- 3. Inborn errors of metabolism such as phenylketonuria, galactosaemia and galactokinase deficiency.

Shelf life:

SMA® First Infant Milk powder has a shelf life of 24 months.

INFORMATION FOR HEALTHCARE PROFESSIONAL USE ONLY

DATA CARD SMA® FIRST INFANT MILK From birth onwards

✓ Halal Certified ✓ Contains 2'FL¹

For information on suitability for use in Halal diets please contact our Careline team.

IMPORTANT NOTICE: We believe that breastfeeding is the ideal nutritional start for babies and we fully support the World Health Organization's recommendation of exclusive breastfeeding for the first six months of life followed by the introduction of adequate nutritious complementary foods along with continued breastfeeding up to two years of age. We also recognise that breastfeeding is not always an option for parents. We recommend that healthcare professionals inform parents about the advantages of breastfeeding. If parents choose not to breastfeed, healthcare professionals should inform parents that such a decision can be difficult to reverse and that the introduction of partial bottlefeeding will reduce the supply of breast milk. Parents should consider the social and financial implications of the use of infant formula. As babies grow at different rates, healthcare professionals should advise on the appropriate time for a baby to begin eating complementary foods. Infant formula and complementary foods should always be prepared, used and stored as instructed on the label in order to avoid risks to a baby's health. The product should be used only on the advice of independent persons having gualifications in medicine, nutrition, pharmacy, or other professionals responsible for maternal and child care.

*As required by legislation for all infant formulas **REFERENCE: 1.** EFSA Panel on Dietetic Products, Nutrition and Allergies (NDA), 2015. Safety of 2'-O-fucosyllactose as a novel food ingredient pursuant to Regulation (EC) No 258/97. EFSA Journal, 13 (7), p.4184.
